

Software Design - iOS
Custom Pointers Worksheet

Download & edit the Microsoft Word (.doc) version of Pointers Worksheet #1.

Your custom worksheet must have 10 similar exercises.

Use the worksheet title "Pointers Worksheet #" instead of "Pointers Worksheet #1".

Print two copies of your worksheet. One copy must have the answers neatly printed with your name written in pencil on the top. The other copy must be a blank copy that Mr. Minich can use as a master copy for future worksheets.

Be sure that your answers are correct by testing your worksheet code in XCode or with an online IDE such as <http://ideone.com>.
